Professional Summary

Full-Stack Software Developer with 5+ years of experience working across React, Hotwire (Turbo, Stimulus), and Ruby on Rails. Specialized in migrating legacy applications to modern, server driven Hotwire architectures, improving performance and maintainability. Strong experience building scalable, role based SaaS and enterprise platforms with a product focused mindset.

Skills

Frontend: React JS, Hotwire (Turbo, Stimulus), JavaScript, HTML, CSS

Backend: Ruby on Rails, Node JS

Databases: PostgreSQL, MongoDB

Infrastructure: Nginx, KVM, AWS S3, Heroku

Tools: Git, VS Code, Jira, Postman

Work History

Product Engineer, 03/2024 to Current

ProMobi Technologies – Pune, India

- Migrated a legacy Angular based MDM application to Hotwire (Turbo and Stimulus) for a cleaner, server driven architecture.
- Built interactive UI components using Turbo Frames, Streams, and Stimulus controllers.
- Developed and optimized backend functionality using Ruby on Rails and PostgreSQL.
- Built and maintained React components for dynamic dashboards, filters, and data heavy screens.

Software Developer, 12/2021 to 02/2024

VoxPro Software – Remote

- Worked on a job recruitment platform connecting companies, recruitment agencies, and job seekers in a single ecosystem.

- Built and maintained React based user interfaces for company dashboards, job listings, candidate profiles, and agency workflows.
- Developed backend functionality using Ruby on Rails, implementing RESTful APIs, consumed by React applications.
- Designed and integrated features for job posting, candidate applications, shortlisting, and hiring pipelines.

Solution Analyst, 05/2020 to 12/2020

Sankey Business Solutions – Remote

- Worked on frontend development using HTML, CSS, Bootstrap, and JavaScript to build and maintain responsive websites.
- Developed and customized WordPress themes and pages based on design and business requirements.
- Collaborated on a campus management system project for the Saudi government, contributing to backend modules built with Django.
- Assisted in implementing core features such as user management, data handling, and administrative workflows.
